Profilo

Profilo range of modular door stations
– extremely reliable with modern design – allows
intercom or videointercom compositions,
even complex ones. Front plates are made
in aluminium and call buttons in stainless
steel, while name-holders are backlit in green
colour. Thanks to a great size optimisation
of the single module, they are particularly
suitable for all the systems in small spaces,
for example on automatic gates pillar.
The range is composed by audio or video
modules with one- or two-row call buttons,
modules with camera with integrated door
speaker, back boxes and accessories that allow
the possibility of a great number of users.

FP52PL
Proximity Reader

Aluminium stand alone proximity reader into a Profilo door station model. Designed for access control, it exploits Profilo accessories for flush or surface mounting, so even compositions for videointercom system are possible. Supplied with two relays with programmable timer according to the features of the connected device. The programming is made through a master card managed by a display and front LED's that indicate also data insertion of the enabled cards. Memory capacity is 500 cards, therefore ideal use is access control of complex buildings or communities. It is provided with 4 cards + 1 master card. Power supply 12 Vac/dc. Dimensions: cm 99x110x17.
For further cards, a set with 10 pieces is available (art. FP 11/10). Moreover, even a trasponder for proximity reader activation with a key-holder is available (a set with 10 pieces, art. FP 12/10).

Built-in back boxes and rain shelters are studied for Profilo modules to be respectively surface or flush mounted. They include the module frames for the precise and exact insert of the corresponding door station modules. They can be combined in order to get an installation of a great number of users. For further protection hood covers can be added to back boxes.
